

No Biofilm Problem in Water Pipe

Drinking water with IDD Demeter:

IDD innovative technology supports healthy animals with IDD Demeter silver water system.

An adequate drinking water supply is an essential component of poultry production. Contaminated drinking water causes distress and disease due to the constant exposure to pathogenic bacteria like Salmonella, Streptococcus, coliforms, and oocysts (coccidiosis) etc. can be carried easily to each pen and each drinking nipple or bowl where they eventually are consumed by a thirsty animal.

Biofilms and mineral deposits allow bacteria to multiply within the drinking line. How more mineral deposit such as iron, manganese, calcium etc. is present -due to hard water for example- how easier it is for organic matter including bacteria to attach themselves to the inside edge of the drinking line.

With IDD Demeter system have IDD the solution for this problem, there will be **NO** biofilm inside water pipe when farmers use IDD Demeter to produce drinking water to birds/chickens.

This is very important point for to fighting the bacteria problem in drinking water system in poultry industry. Even with a very low concentration of silver dosage is it complete free from this kind of problem.

We recommend every poultry farm in world to use IDD Demeter for the drinking water solution to the animals on farm.

IDD Demeter

IDD Demeter Cartridge for silver water

Look at water pipe is inside after 6 month use! Without IDD Demeter silver water generator

For one example: This farm have huge problem with Salmonella, Streptococcus, coliforms bacteria before they start with IDD Demeter.

They started with IDD Demeter and after two weeks was the problem completely finish, they save extremely much money every year to use IDD Demeter silver water solution and the payback time can we just talk about some few weeks! There is not many invest in the poultry industry who can show so short payback time for some investments.

Do not think any more! Talk with your locally IDD Dealer, they will help you with the best solution for your farm.
